Simple bug guide – Enter bug information

This is the last step.	
Please enter a **short** summary of the bug.	Beagle index email results for Thunderbird bring up blank email if Thunderbird oper
Please describe the problem.	When Thunderbird is open (necessary for plugin indexing) and you double click conversation in the Beagle search results, it results in a blank email. It only works if you first have Thunderbird closed and then it only works onc
How can the problem be reproduced?	1. Use Beagle 0.30.0 and Beagle Indexer 0.1.2 to index your Thunderbird IMAP account 2. Launch Thunderbird 3. Launch Beagle search dialog 4. Double click on an email from the conversations results
What actually happens when you follow these steps?	It results in a blank email brought up from Thunderbird.
What would you expect to happen when you follow them?	It should result in an email with its content present.
Does this happen every time?	Except when Thunderbird is not running when you double click in the search results.
If you have any other information to add to this report, please enter it here:	Thunderbird 2.0.0.5 Beagle 0.30.0 Beagle Indexer 0.1.2 (for Thunderbird) Ubuntu Feisty

That's it! Press "File bug" to file your bug. Thank you!
