<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Item 14 (previous day)

Standard field

### Explanation

- ➔ Email, telephone, chat as well as letters are all communication tools using the same address book. Devices are ever more synchronized. How to archive all communication?
- ➔ The future of communication is: ONE address book and database!
- ➔ Drag and copy are inconvenient ways to archive communication.
- ➔ Marking incoming and outgoing communication makes content be easily and quickly managed.
- ➔ Click on (project) map to see survey of all incoming and outgoing communication

Tip (for Novell):

Contract a design company or start a design contest to improve the outdated looks of Evolution

### Fast archiving
